

ALtech ALbelt OPEN STRUCTURE LABELING SYSTEM

Labeling System

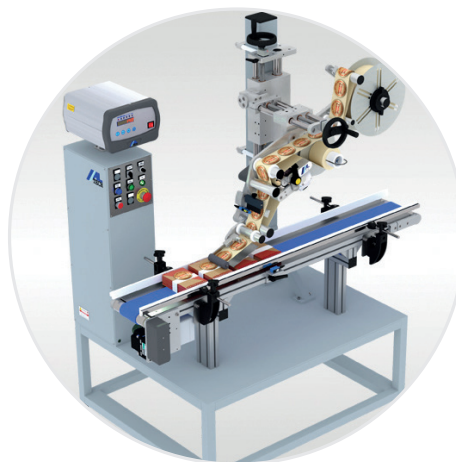

ALbelt is a simplified linear labeling system which is open and compact, completely automatic and particularly economical. It can be configured for top and side labeling of various products: box, case label applicator.

With its large, simple and solid structure, ALbelt Open Structure houses a **conveyor** and a **label applicator (ALstep or ALritma model)**, along with some accessories, the most common being: spacers with side belts, wrap-around units, folding units, feeding groups and various actuators together with their control components.

An orientable control box is located just over the electrical apparatus.

The structure is conceived to be compatible with the various configurations of ALTECH labelers in order to provide a level of industrial standardization which allows for complex models which can be adapted and modified at a **genuinely low turnkey price**.

ALbelt is a particularly low-cost labeling system which nevertheless boasts a complete, cutting-edge configuration, ideal for labeling cases, boxes, and cans with upper or side labels, including wraparound labels.
